SUMMARY	Computer Science & Engineering student with hands-on experience in managed IT services, technical support, and process automation. Strong foundation in system workflows, problem-solving, and software fundamentals. Currently pursuing engineering internships with interests in automation, systems, and applied AI.
EXPERIENCE	Support Engineer Dec. 2025 - Present PERRY proTECH - Internship Lima, OH • Design and implement workflow automations using Rewst to reduce manual operational tasks. • Develop and maintain automation logic integrating platforms such as RMM, PSA, and Microsoft Graph to streamline processes. • Build data-driven reports and automated workflows to improve policy alignment, ticket handling, and operational visibility. • Collaborate with engineers and support teams to identify repetitive workflows and translate them into scalable solutions.
PROJECTS	Ticketing Workflow Automation PERRY proTECH - Internal Automation Project • Team-initiated automation project aimed at reducing manual effort in ticketing workflows. • Designing and testing Robotic Process Automation logic, Applying the process analysis and logical workflow design in a real-world IT environment. Personal Portfolio Website • Designed and built a personal portfolio sites using HTML and CSS. • Deployed via GitHub Pages, Used to showcase technical experience, projects, and development
PROGRAMS	Honda Beta Group Program 2025-2028 Honda & OSU Partnership Program • Participate in monthly professional and technical development events • Receive exclusive access to Honda co-ops, internships, and networking opportunities throughout undergraduate studies.
SKILLS	• HTML, CSS, Python, C++, Java • Robotic Process Automation (RPA) • GitHub • IT Ticketing Systems • Windows and macOS Environments
EDUCATION	The Ohio State University 2024-2028 Bachelors of Science in Computer Science & Engineering • Physics Research Using Python Programming Language
