

Michael Frueh Jr.

SOFTWARE ENGINEERING | APPLIED AI | APIs & AUTOMATION

419-516-8450 | frueh.42@osu.edu | michaelfrueh5589@gmail.com
michael0135.github.io/portfolio-site

PROFESSIONAL SUMMARY

Software engineering student with experience designing, building, testing, and improving mobile, backend, browser, and automation systems. Proficient in Java, Python, JavaScript, and Dart, with hands-on experience in REST APIs, databases, Git, unit testing, AI-enabled applications, and Agile software development.

EDUCATION

The Ohio State University

Columbus, OH | Expected May 2028

Bachelor of Science in Computer Science & Engineering - Artificial Intelligence Specialization

Cumulative GPA: **3.2** | Junior standing

Relevant Coursework: Software Development & Design, Data Structures & Algorithms, Discrete Structures

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Dart, C++, HTML, CSS

Frameworks & Data: FastAPI, Flutter, SQLite, Hive, REST APIs, OpenAI API, Microsoft Graph API

Developer Tools: Git, GitHub, JUnit, VS Code, Eclipse, Rewst, NinjaOne, ConnectWise, Browser Extension APIs

Software Engineering: Object-oriented programming, data structures, algorithms, debugging, API integration, SDLC, Agile, unit testing, software automation

RELEVANT EXPERIENCE

Perry proTECH - DevOps Engineer Intern

Lima, OH | Dec. 2025 - May 2026

- Engineered automation workflows integrating NinjaOne, ConnectWise, and Microsoft Graph API to retrieve device data, evaluate policy overrides, apply end-of-life policies, and generate operational reports.
- Converted recurring support processes into modular, reusable workflow logic and validated system behavior against live data.
- Collaborated with engineers to gather requirements, troubleshoot integrations, and create test records and technical documentation supporting maintainability.

Honda - Data Services Student (Incoming Co-op)

Marysville, OH | Jan. 25 - May 7, 2027

- Selected to support data and IT initiatives through analysis, stakeholder requirements, project planning, standardized reporting, and process improvement.

The Ohio State University - IT Help Desk Student Technician

Lima, OH | Oct. 2025 - Present

- Troubleshoot hardware, software, account, and network incidents; document resolutions, identify recurring issues, and escalate complex problems with complete technical records.

SOFTWARE PROJECTS

MicDrop - AI Study Application | Python, FastAPI, Flutter, Dart, OpenAI API, Hive

- Designed a full-stack application that transforms lecture audio and course materials into structured notes, quizzes, and flashcards through REST API integrations.
- Implemented persistent storage, search, export, and content-management workflows while using course context to improve AI-generated study content.

AI Content Shield - Privacy-First Browser Extension | JavaScript, HTML, CSS, Chrome/Firefox APIs

- Built local-first content-processing and configurable blocking architecture for Chrome and Firefox without accounts, telemetry, or cloud inference by default.
- Developed evaluation and calibration tooling with 45 passing tests; benchmarked 9,250 analyses at approximately 0.15 milliseconds per analysis.

MichaTone - Offline Music Application | Flutter, Dart, SQLite, Android

- Built an offline-first application with background playback, search, playlists, queue restoration, analytics, metadata, and local recommendations.
- Verified code quality through static analysis, debug/release builds, and 55 passing tests.

Honda Launchpad - Autonomous Factory Pallet Mover | Team Engineering Project

- Collaborated on an eight-person team to design and program an autonomous prototype, integrating software and hardware while iterating toward a working demonstration.

ACHIEVEMENTS & AFFILIATIONS

AI Hackathon: One of 8 winning teams among 70 teams; collaborated to develop and present a working AI solution under time constraints

Technical & Campus Involvement: ColorStack | AI Club | OSU Dev | Big Data Analytics Association | Disciples On Campus
